Medicom’s SafeGauze HemoStat is a safe and effective solution designed to control bleeding instantly. Once in contact with blood or fluids, the fabric quickly transforms into a clear and viscous gel creating a tight seal to control the bleeding and promote wound healing. Made from 100% cellulose, SafeGauze Hemostat helps the clinician offer a fast, safe treatment for their patient.
**Features** | **Benefits**
--- | ---
Transforms into a gel within seconds | Easy placement
Absorbs more than 45x its own weight | Formation of a strong clot for effective wound healing
Strong adherence to tissue | Dressing does not need to be sutured over as it stays securely in place
Made from 100% hypoallergenic cellulose with no porcine or other animal based products and no chemicals | Safe and natural treatment for patients
Natural antibacterial properties | Promotes wound healing and reduces the incidence of infection post surgery

**How it works:**
- When placed on extraction site, SafeGauze HemoStat absorbs the water content of fluids and blood.
- It quickly transforms into a clear, viscous gel within seconds
- The gel fills and adheres to the extraction site forming a plug to control the bleeding
- The material eventually dissolves to saline and glucose
- Ideal for extractions, periodontal surgery and other selected procedures
